Abstract

This system is an automated system which is especially designed and developed for the educational institutions. It generates exam form for a particular student to fill the form and submit through online payment. It will reduce paper work to be an integrated online exam form portal. It is generated by the server. Administrator has privileges to create, modify and insert the student data. User can login through his specific id and can view the exam form .The aim of our project is to automate the Exam form generation with online payment, reduce the time and efforts.

Keyword-Automated System, Web based, Online payment, Effective.
