Semester Long Internship Project Undertaken At Ensivo Solution Pvt.ltd.

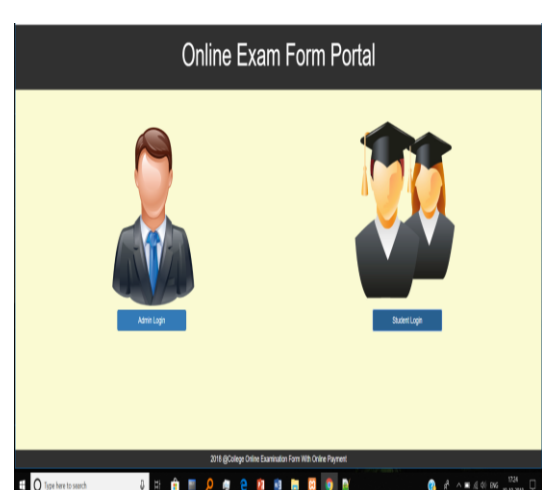

Examination Form Portal

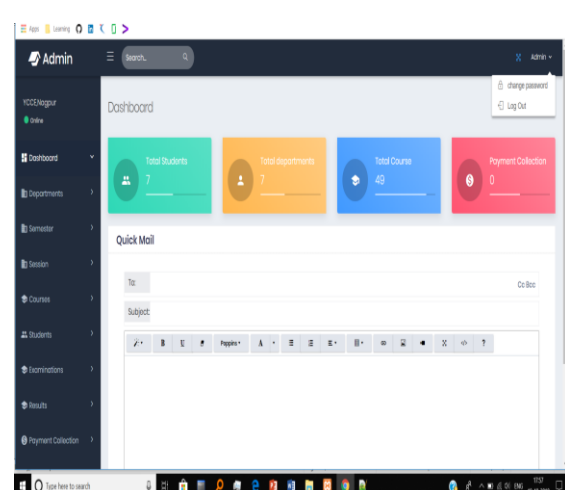

Preamble

The purpose of examination form portal system is to automate the existing manual work system by the help of computerized equipment. This system described as above can lead to error free, secure, reliable and fast management system. Every student has face the burden of standing in a long queue, waiting all day just to submit their Exam form, Examination form portal System has reduced that burden to 0%. Now students can submit their form from their home or cyber cafe without standing or waiting in a long queue The main objective of this project is to manage the details of student and generate automatically exam form with online payment. It manages all the information above exam form and payment is totally build at administrative end and thus only administrative granted the access. This project has mainly three modules. 1.Admin Panel,2. Student Panel,3. Payment Gateway. Admin Panel- It generate the exam form for student. Student Panel-Student can login and fill exam form and submit after that go to payment. Limitation of no of student can give examination at a time. Advantages of this project Handshake to digital world ,Save time and efforts, Save paper, save environment, Group report performance analysis.

Flowchart of our Project:

Conclusion

The Examination Form Portal System is developed using Php, jQuery, JavaScript, Bootstrap and MySQL fully meets the objectives of the system for which it has been developed. The system has reached a steady state where all bugs have been eliminated. The system is operated at a high level of efficiency and all the students and admin associated with the system understands its advantage. The system solves the problem. It was intended to solve as requirement specification.

Future scope

Scope of this project is very broad in terms of other manually fill exams form. This can be used in educational institutions as well as in corporate world. Can be used anywhere any time as it is a web based application (user location doesn't matter).
